RECEIVED

FIFTY-SECOND ANNUAL REPORT

of the

LOCAL GOVERNMENT BOARD

of the

PROVINCE OF SASKATCHEWAN
for the twelve months ended December 31

1966

Regina, Saskatchewan,
January 31, 1967.

The Honourable W. Ross Thatcher,
President of the Executive Council,
Legislative Building,
Regina, Saskatchewan.

Sir:

Under instructions from the Local Government Board and pursuant to the provisions of The Local Government Board Act, being Chapter 43, Revised Statutes of Saskatchewan, 1965, I have the honour to transmit to you the Report of the Local Government Board for the year ending December 31, 1966.

I have the honour to be, Sir,

Your obedient servant,

H. S. McMillan,
Chairman.

Regina, Saskatchewan,
January 31, 1967.

The Honourable W. Ross Thatcher,
President of the Executive Council,
Legislative Building,
Regina, Saskatchewan.

Sir: -

The Local Government Board has a wide variety of responsibilities assigned to it by the Legislature. (See Appendix "A" for list of relevant statutes.) These responsibilities are almost all related in some way to local government administration with the principal task being regulation and supervision of municipal, school, union hospital, etc. capital financing; especially by way of debentures. Assigned responsibilities also include, broadly speaking, such controls as control of local authority accumulation and disposition of capital reserve funds and, in some cases, capital assets. Of a somewhat different character are the quasi-judicial responsibilities of the Board in the field of rate regulation of privately owned municipal utilities, privately owned electricity generating and distribution systems, petroleum pipelines, natural gas production and distribution systems. It is with local government financing problems that most of the Board's time is occupied and it is with this aspect of activity that this report is mainly concerned.

In the local government field the Board regards its primary purpose to be that of trying to preserve credit ratings of Saskatchewan local municipal governments. Thus, the Board has an interest in the financial implications of policies followed by cities, towns, villages, union hospital districts, school boards, school units and other local authorities in the province. The Board has, of course, authority to control such important aspects of local government financing as issuing of debentures, investment of sinking funds and use of capital funds arising from a variety of sources. However, because of its position, the Board has influence beyond that provided by statutes and this influence along with the controls it administers are directed towards encouraging prudent and careful operations so that Saskatchewan municipalities, schools, hospitals, etc. require and retain good credit ratings.

Comparative figures on debenture borrowings by Saskatchewan local governments for each of the last several years are set forth in Tables I, II, III and IV below. These tables show that at $37,095,000.00, debentures signed and sealed by the Board in 1966 totalled more than in any year since the Board began operations in 1913. It will be noted that the 1966 figure exceeds the record of total issues of $27,153,000.00 established in 1965 by almost $10,000,000.00 and this was accomplished despite the difficult marketing conditions which were encountered during the latter part of the year 1966. The Board's records show that the major portion of the increase as between 1965 and 1966 is accounted for through borrowings for school purposes. In 1966 debenture issues signed and sealed by the Local Government Board to finance the cost of school facilities amounted to $16,400,000.00. This is an increase of approximately $8,900,000.00 over the figure for 1965 ($7,500,000.00). This is greater than twice the average annual amount borrowed for this purpose during the years 1961 to 1965 inclusive and represents 44% of the total debenture borrowings in the year under review. Borrowings by town and village municipalities were down slightly with union hospital boards borrowing slightly more than in 1965. The city municipalities accounted for the remaining increase with borrowings in 1966 approximately $1,700,000.00 greater than in 1965 for municipal purposes (excluding borrowings under The Secondary Education Act for school purposes referred to earlier herein).

The demand for capital borrowings by all types of local authorities in the province to finance a variety of capital works continued at a high level during the year 1966. As was the case in 1965, our issues during the first four or five months of the year 1966 were disposed of without serious difficulty with money costs running generally in the area of 6% to 6½% depending on the class of security. Local sales of municipal debentures continued strong during this period and there were a number of dealers actively interested in selling Saskatchewan local government securities.

However, commencing with May and June of the year a great many sources of investment funds disappeared and interest rates started to increase. By September it was obvious that there was likely to be a period when it would be extremely difficult to find markets for any substantial amount of municipal debentures. This situation not only applied to Saskatchewan but to other local governments in every part of the country. The cost of money increased to a point where a number of our local authorities have had to pay as high as 7.3% to 7.4%. This is the highest rate which our local governments have had to pay since pre-depression times.

The Board estimates that, as of July 1, 1966, there was a backlog of unsold debentures in excess of $37,000,000.00, which the Board feels is an abnormally large amount of debentures to have unsold at any time.

In the circumstances the Board felt that it must exercise its responsibility in an effort to reduce the overall amount of debentures which would be offered for sale during this difficult period of time. While it dislikes intensely interfering with the normal plans and activities of the local governments in the province, it had no alternative but to adopt a policy of extreme caution in the authorization of further debenture borrowing. Unless, therefore, it could be clearly demonstrated that any project to be financed by long-term borrowing was urgently required the Board, either persuaded the officials of the local government concerned to postpone the project or, withheld its authorization of the debenture borrowings. The Board acknowledges the co-operation it has received from the officials of many local authorities in its efforts to reduce the overall amount of debenture borrowing during this difficult period of time. The Treasury continued to contribute to the successful marketing of certain issues of smaller local governments in 1966 by purchasing balances remaining unsold after maximum public sales had been made. Treasury policy is to buy what a local authority cannot sell up to 50% of the issue. The policy applies to debentures issued for schools, hospitals and water and sewer systems. Its application is confined in the main to local authorities in rural areas -- towns, villages, union hospital districts, school units and small school districts. During the year covered by this report the Board recommended purchase by Treasury of $4,083,125.00 which compares with $2,880,632.00 in 1965 and $2,342,744.00 in 1964. Treasury, however, buys other municipal debentures as investments outside of the policy referred to herein and the Board's information is that the total assistance given in this connection during 1966 was approximately $5,591,000.00.

As was the case for the year 1965 the total debenture sales in 1966 includes debentures taken by Treasury under the Municipal Development and Loan Fund program and those taken by Central Mortgage and Housing Corporation under the program of assisting municipalities to finance the cost of certain aspects of sewerage disposal projects. It is expected that all debentures involved under the Municipal Development and Loan Fund program will be issued by the end of 1967.

The Board is convinced that no further significant amount of debentures could have been sold at reasonable rates of interest during the latter part of the year. There appeared

to be relatively little money available for this purpose in Eastern Canada and the local market in Saskatchewan was pretty well exhausted.

During the year under review the Board dealt with 524 applications for permission to issue debentures in the total amount of slightly more than $46,075,000.00. It granted 481 of these applications in whole or in part in the total amount of approximately $36,536,000.00. Authorization was withheld in connection with 43 applications and the total amount involved in this respect was approximately $9,539,000.00 (includes the amount also by which applications partially granted by the Board were reduced from the original amount applied for). For comparative purposes, in 1965 the Board authorized 541 applications for a total of $42,341,000.00, and in 1964 it authorized 632 applications for a total amount of approximately $39,500,000.00. It should be stated here that it is not possible to compare the figures given on authorizations in any one year with the figures on debentures signed and sealed by the Board for the corresponding year because of the fact that many issues, though authorized in one year, are not sold until the next. Furthermore, all authorizations do not necessarily end in debenture issues, bylaws may be defeated at the polls, works may not be undertaken, etc.

It is noted that practically all refusals of applications occurred in the latter half of the year during the period of difficult debenture markets. It could not, however, be said that permission was withheld in all cases due to market conditions because there were some instances where the Board was more concerned about the heavy debt load involved than other matters. It finds that in some areas the rising debt is reaching a point where further debenture borrowing can only be undertaken to a minimum extent.

The Board dealt with 316 applications from the councils of cities, towns, villages and rural municipalities for approval to construct works as local improvements. It granted applications having an estimated cost of $16,752,000.00 and withheld its approval in other cases having an estimated cost of $447,153.00. In 1965 the Board approved of 442 applications with an estimated cost of $15,862,838.00 and in 1964 it approved of 382 applications with an estimated cost of $15,505,483.00. Local improvements are works which are undertaken under the provisions of The Local Improvements Act whereby a part or all of the cost of the work is specially assessed against the lots abutting on or benefited from such works. The Board's approval in these cases represents tacit consent to the issue of the relevant debentures to finance the portion of the

actual cost not paid out in cash by the property owners themselves or met through grants and surplus funds of the municipality. As a general rule, the amount borrowed is considerably less than the estimated cost because of the reductions referred to and the fact that, in some instances, the work is petitioned out by the property owners and, therefore, not constructed. The debentures are usually issued in the year following construction.

The Board also held eleven inquiries with regard to depriving abutting property owners of petition rights under The Local Improvements Act. Most of these cases related to applications filed with the Board by the councils of city and town municipalities for approval to construct storm sewers as district local improvements. (See Appendix K.) After hearing the evidence and carefully considering the case, the Board granted all the applications involved with the exception of one.

A brief summary of the Board activities over the course of 1966 follows below. Further details may be obtained by referring to the appendices of this report. The miscellaneous applications relate to a wide variety of matters including approval of a great many different types of bylaws, changes in rates of interest, changes in modes of issue, consent to consolidation of debenture debts, extensions of time for passing bylaws, use of unexpended bylaw balances, use of excess sinking fund interest earnings, etc., etc. The Board does not consider that any useful purpose would be served in reporting these matters in detail.

233	Formal Board meetings were held;
524	Applications for debenture issues totalling approximately $46,075,000.00 under various acts were dealt with;
322	Applications for approval to construct local improvement works under The Local Improvements Act;
735	Miscellaneous applications were dealt with;
11	Budgets were examined and tax rates established as required under The Local Government Board (Special Powers) and (Temporary Special Powers) Acts;
43	Transactions in Sinking Funds under Board control were approved;

90 Transactions in R.M. Capital Trust Funds were approved by the Board as authorized in Section 204 of The Rural Municipality Act;

19 Transactions in other Capital Accounts were approved;

84 Agreements under The Housing and Special-care Homes Act 1965 were approved.

During the year 1966, several changes have taken place in the membership of the Board. In May, Mr. W. L. Haney resigned to accept a position in the Federal Government service at Ottawa after having served on the Board commencing with April of 1959. He served as Chairman from October of 1960 to May of 1966. Mr. H. S. McMillan was appointed to replace him. In July, Mr. M. A. Swenarchuk, former Secretary-Treasurer of the R.M. of Aberdeen No. 373, was appointed as a Member of the Board bringing the Board's complement up to the traditional three.

In the matter of staff, the re-instatement of the position of Administrative Officer IV has been of material assistance in carrying on the work load of the Board. Mr. A. C. McEachen, who has served on the Board's staff since January of 1948, was appointed Secretary to the Board in May. We wish to express our appreciation to the members of the Board's staff who have conscientiously and faithfully carried out their individual duties during the year.

The Board also expresses its sincere thanks to the officials of many departments of government, local authorities, investment dealers, banking institutions, consulting engineers, and all others for the co-operation received from them during the year.

Revenues received by the Local Government Board in 1966 were $75,329.54 with expenditures of $78,319.27.

Respectfully submitted,

H. S. McMillan, Chairman,
E. B. McKay, Member,
M. A. Swenarchuk, Member.
